EXPERIENCE:

Website Developer-[DigiBoomLabs](#)| September 2023 – march 2025

- Developed customized WordPress websites and optimized themes to enhance user engagement, site performance, and clients' online presence.
- Designed and managed Shopify ecommerce websites, improving functionality and streamlining the customer journey.
- Implemented on-page SEO best practices, including keyword optimization, meta tags, image optimization, and technical SEO improvements to increase search engine visibility and organic traffic.
- Regularly engaged with clients to understand their needs, provide updates, and deliver personalized solutions.

Wordpress Web Developer-[LeadsArkEdutechPrivateLimited](#)| April 2025 – present

- Developed end-to-end WordPress websites from the ground up using custom-coded solutions.
- Utilized custom coding to enhance website design and user experience.
- Created Custom Post Types (CPT) and implemented Advanced Custom Fields(ACF) to build dynamic, scalable content structures.
- Developed custom plugins and shortcodes to extend Elementor functionality and add advanced features without relying on paid extensions.
- Implemented technical and on-page SEO best practices, including schema markup, optimized metadata, image optimization, clean URL structures, and performance improvements to enhance search engine rankings.
- Regularly engaged with clients to understand their needs, provide updates, and deliver personalized solutions.

PROJECTS:

[\[LINK\]](#) **SpotifyClone:** Developed a fully responsive music player using HTML, CSS, and JavaScript, featuring a functional seek bar, volume control, and a dynamic folder-based song navigation system. Clicking on a folder displays the relevant songs in the left sidebar, with content fetched using the JavaScript `fetch()` function for seamless playback integration.

[\[LINK\]](#) **Palini.in :** The project is an e-commerce website built on Shopify. It features an elegant, mobile-friendly design with optimized product pages, seamless checkout, and branding tailored to terracotta craftsmanship.

[\[LINK\]](#) **SpinCare.in :** Developed and optimized the SpinCare.in website using WordPress with Elementor as the primary page builder. Implemented several custom HTML, CSS, and JavaScript elements to enhance design, interactivity, and user engagement. Focused heavily on SEO, performance optimization, and mobile responsiveness to ensure fast loading speeds and a smooth browsing experience. Delivered a clean, modern UI with improved navigation and visual consistency.

[\[LINK\]](#) **LanguageTranslator:** Language Translator is a Python project enabling multilingual text translation using APIs, offering a simple and efficient translation interface.

[\[LINK\]](#) **Voice Assistant :** This project is a Python-based application designed to perform tasks and answer queries through voice commands. It leverages libraries like Speech Recognition, pyttsx3 and pyaudio for voice input and output, combined with APIs for various functionalities.
